MON PROFIL

✨ Developer Profile

Passionate Mobile Developer with solid experience in designing and developing innovative applications. Expert in Dart, Flutter, and Nest.js, with a strong command of state management solutions including Provider, BLoC, and Riverpod. I also have significant expertise in setting up modern CI/CD pipelines, creating reusable packages, and optimizing development workflows, enhancing productivity and code quality across multiple projects.

Driven by technical excellence and attention to detail, I am committed to building reliable, scalable, and user-centered solutions. I thrive in fast-paced environments, working collaboratively with cross-functional teams to deliver high-performance applications that meet and exceed client expectations.

I am continuously exploring emerging technologies, integrating best practices in mobile architecture, testing, and performance optimization. My goal is to contribute to ambitious projects that combine technological innovation with real-world impact, delivering meaningful digital experiences that resonate with users.

ÉDUCATION

Master en Génie Logiciel et Développement Rapide d'Applications

Université Iset
2017- 2022

Licence en Technologie

Salem Ben Hmida
Université
2012- 2016

EXPÉRIENCE

Mobile Developer

Continuous Net

2022 -2026

- 🚀 Experience
- Development and maintenance of high-performance, scalable Android/iOS mobile applications with Flutter.
- Design and implementation of RESTful APIs with Nest.js, ensuring robustness and security.
- Setup of automated CI/CD pipelines (GitHub Actions / GitLab CI), including Firebase App Distribution for rapid delivery to testers.
- Integration of Firebase Cloud Messaging (FCM) for advanced notification management (push, topics, individual tokens).
- End-to-end ownership of the application lifecycle, from design to deployment and maintenance.
- Collaboration with cross-functional teams (product, design, QA) to transform business requirements into effective and innovative technical solutions.

COMPÉTENCES

- **Widget development**
- **Programming language: Dart**
- **State management (Provider, BLoC, RiverPod)**
- **Integration of third-party libraries and APIs**
- **Development of RESTful APIs**

Firebase :

- CI/CD with Firebase App Distribution for rapid delivery to testers
- Firebase Cloud Messaging (FCM) for push notification management (topics, individual tokens)
- Use of additional services (Authentication, Firestore, Crashlytics, Analytics) to enrich the user experience and ensure quality
